Transformation of the theme

**Export reality:
Will Russian dairy products
become a part of the global
market?**

CONCEPT OF THE FORUM2019

The 6th International
Agricultural Dairy
Forum

Moscow region
Krasnogorsk
26-27 November
2019

In December 2019, the third year of the implementation of the priority project “Export of agricultural products” ends. The project involves increasing exports of agricultural products to \$ 30 billion by 2025. In 2018, the president set a task to increase the turnover of agricultural exports to \$ 45 billion per year by 2025.

The dairy industry has great export potential: according to the forecasts of the Ministry of Agriculture of the Russian Federation, exports of dairy products could grow to \$ 1 billion by 2025. However, despite the attention and support from the government, in 2018, dairy exports decreased by 12% and amounted to 243.5 \$ million, which indicates a number of problems in the industry.

What does the dairy industry need to fulfill the tasks set by the country's President?

CONCEPT OF THE FORUM 2019

Milk unites all of us not only as a biological species, it is an important cultural pattern. A glass of warm milk before bedtime in our childhood was a source of reassurance and helped to forget about anxieties; fresh milk reminds us of grandparents, summer holidays in the countryside; milk in our culture is the basis of health and growth, a nutritious supplement to the diet, a symbol of prosperity. Being an inherent part of the culture in the homeland, Russian milk penetrates the international market and continues to receive approval of foreign consumers.

The program of International Dairy Forum 2019 is dedicated to this.
