

Republic of Mordovia.
Cooperation opportunities

Mordovia. Geographic location

- About 40 million people live within 500 kilometers from Saransk.
- The distance between the capital of Mordovia Saransk and Moscow is 653 kilometers (1 hour by plane).
- Mordovia borders with Ulyanovsk, Penza, Ryazan, Nizhniy Novgorod regions and the Chuvash Republic.

Comfortable living conditions

- Saransk is a well settled, safe and green city
- Automated intelligent system called the "Safe City" provides safety in Saransk
- Saransk is the host city of 2018 FIFA World Cup Russia

Education

- Republican Lyceum Center for gifted children is the second best school in Russia
- N.P. Ogarev National Research Mordovia State University is a top-ranked center of staff training for all the country

Technopark Mordovia

Experimental production center – 8 231,7 m²

Innovation design center – 3 991 m²

Innovation and production complex

Center of energy-efficient lighting engineering – 9 855,2 m²

Fiber optics engineering center – 6 181,8 m²

Main building
14 536,6 m²

Information and computing complex – 5 830 m²

Innovation and production complex

Industrial premises
from 30 to 1000 m²

Offices
from 30 to 300 m²

The only Data Centre in Russia with the highest level of liability and availability of information TIER IV

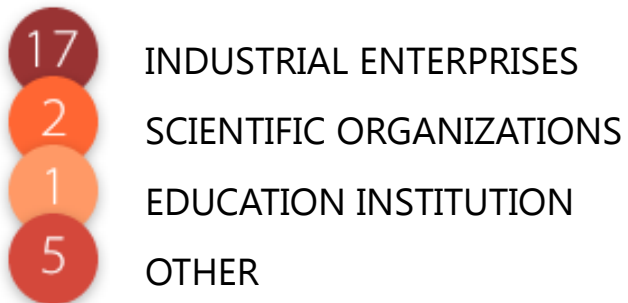

- Colocation
- Virtual servers
- Dedicated servers
- Data storage systems (including archive database)
- Other services

Energy efficient lighting engineering and intelligent lighting control systems

- The widest range of products manufactured in Russia
- Long history of cluster's members – over 50 years
- Large distribution network in Russia and CIS countries
- High level of coordination of cluster's members within the Association 'Rossiyskiy Svet' (Russian Light)
- Strong ties with the leading scientific centers of Russia
- High educational, technical, scientific and human resources potential

TOTAL NUMBER OF
MEMBERS OF THE CLUSTER

- 25

Production of
fiber optic cable
(from 2000)

Production of
telecommunication optic fiber
(from 2015)

Innovation Design Center

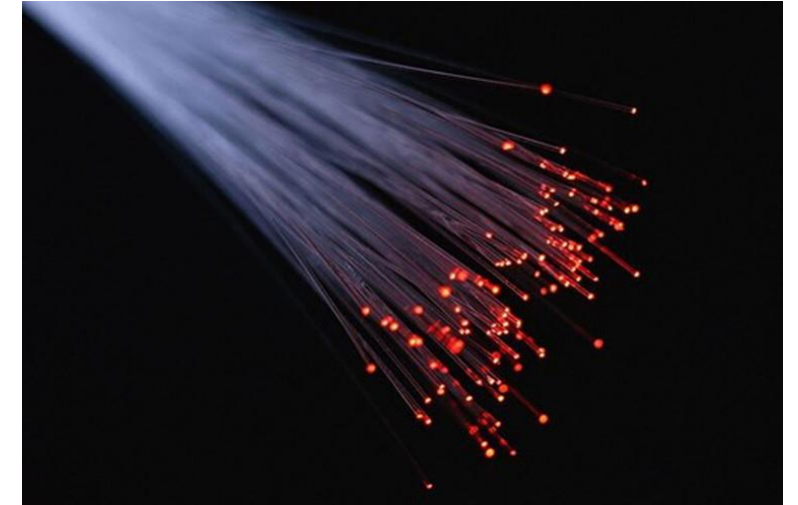

Prototyping of products and firmware, carrying out of tests
(from 2015)

Fiber Optics Engineering Center (FOEC)

Development of technologies for production of special optic fiber and optic fiber-based instruments. Training of specialists in fiber optics and optoelectronics
(from 2016)

FOEC-based project companies

Production of special optic fiber, fiber-optic devices and systems based on these devices
(from 2016)

Pharmaceutical industry

- One of the leaders in Russia in production of medicines and pharmaceutical substances
- The only enterprise in Russia producing dextran-based blood substitutes in cyclical turnaround, starting with producer strain culture and biosynthesis process
- The product range includes over 100 medicines in injection, tablet, ampule, capsular and other forms
- 90% of produced items are included in the Essential Medicines List

Cable production

- Cable manufacturing plants in Mordovia produce up to 10 per cent of all the products in the Russian cable market
- About 2,000 specialists are involved in cable production in Mordovia

Power electronics

- Enterprises of regional cluster of power electronics produce one-tenth of all the products of the industry in Russia
- “Electrovypryamitel” has a long-standing partnership with the company «SIEMENS». It produces high-voltage and GTO thyristors under license agreement.

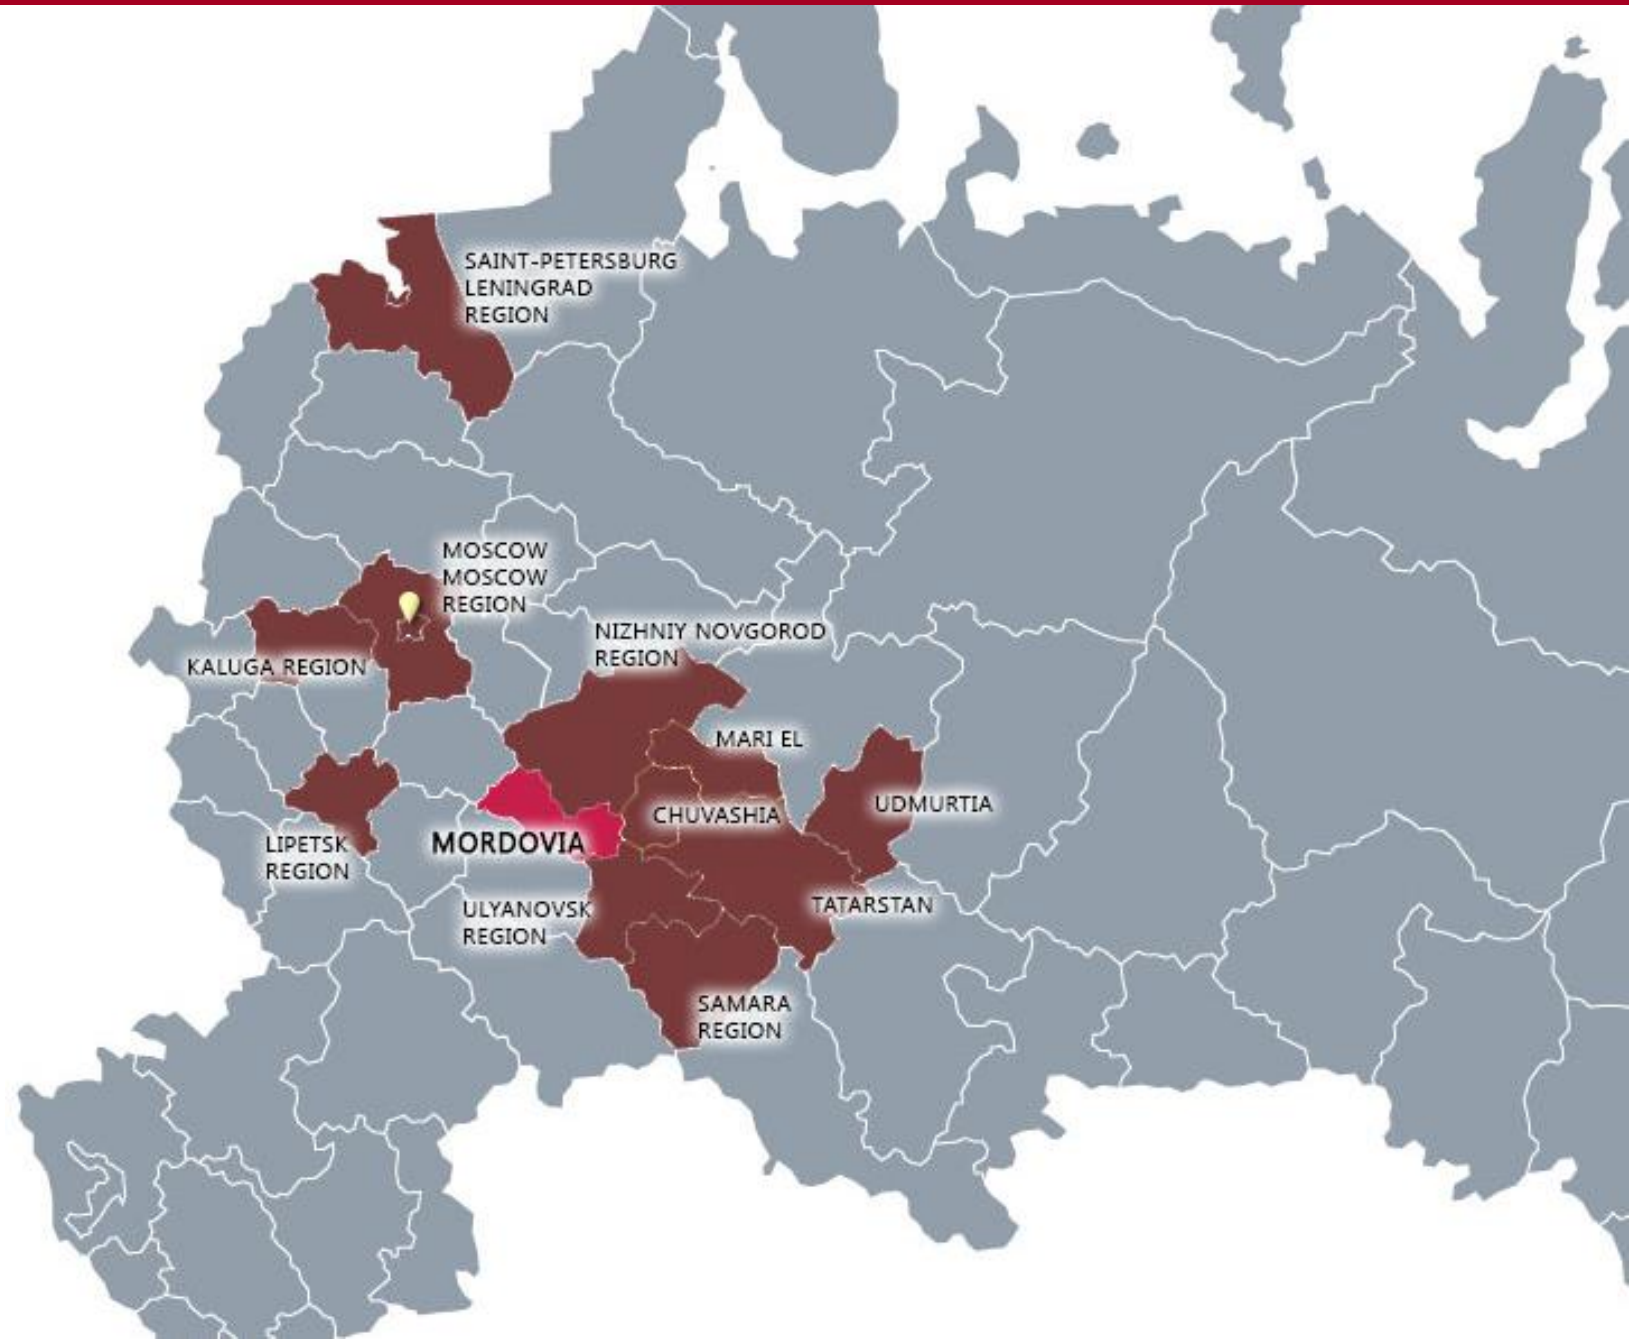

Building materials production

- Production of building materials in Mordovia is represented by one of the most advanced companies in Russia, which is Mordovcement.
- The volume of products manufactured by the cluster is more than 8% of the Russian market.

Auto parts production

A lot of companies specialized in motor vehicle production are located very close to Mordovia

Auto parts production

Metallurgy company "MVS" is one of the largest recyclers of scrap and metal waste in the Russian Federation, as well as the manufacturer and exporter of secondary aluminum alloys

- Primary processing of scrap and waste of ferrous and non-ferrous metals in the amount of 300 thousand tons per year
- Smelting of 72 thousand tons of secondary aluminum alloys per year
- Production of more than 50 types of alloys
- Registered member of London metal exchange (LME)
- First place in Russia by volume of export of secondary aluminum alloys
- Wide geography of deliveries, which includes dozens of countries in Europe, Southeast Asia and North America

Wide range of aluminum alloys and almost unlimited range of custom designs regarding ordered chemical composition of final products

OFFICIAL PARTNER

Rubber goods production

- 1st place among Russian producers of non-tire rubber goods
- Over 3 000 highly qualified specialists
- Products supplier to more than 4 000 largest industrial enterprises
- Production capacity is over 5000 tons per month
- The product range includes over 20 000 items
- Products are supplied to all regions of Russia and 35 countries

RubEx
group

Agricultural sector

The region is one of the leaders in Russia in agricultural production per capita. It is ranked:

- 1st in egg production;
- 1st in milk production;
- 2nd in meat production

} in Volga Federal District

Food processing in Mordovia is presented by enterprises producing confectionery, beverages, sugar and cheese.

Areas of Mordovia Specialization

**Lighting
engineering**

**Power electronica and
microelectronics**

**Fiber optics and
optoelectronics**

**Instrument
making**

**Cable
products**

Agriculture

**Transport and farm
machine building**

**Construction
materials**

Food industry

IT

**Pharmaceutical
industry**

**Chemical
industry**
