International Machine Tool Exhibition

STANKOSTROENIE-2014

October 14-17, Crocus Expo, Moscow, Russia

METALWORKING MACHINE TOOLS, COMPONENTS, INSTRUMENT, BEARINGS, SHEET METAL WORKING, WELDING EQUIPMENT, FOUNDRY, MEASURING EQUIPMENT, INFORMATION TECHNOLOGIES, UPGRADING, ELECTRICAL ENGINEERING, WOODWORKING, LASERS, PNEUMATIC TOOLS, SOFTWARE

www.stankoexpo.com

The Organizer: Right Solution LLC

Dear ladies and gentlemen!

You are kindly invited to participate in the **International Machine Tool Exhibition STANKOSTROENIE-2014 (IMTES)**, held on **October 14-17, 2014** in the Crocus Expo Exhibition Center, Moscow, Russia.

The announced modernization seized a vivid business activity in Russia. Innovative technologies and modern machines are in great demand now. The STANKOSTROENIE Exhibition has already become the significant trade show where the decision-makers from all regions of Russia come to buy machine tools and instrument. The companies starring in this exhibition: **Spinner, Iscar, MWM Engineering, Ajan, CTM, Durmazlar, Promoil, Baltiyskaya Promyshlennaya Company, Japan Tool Service, CTCutting** and many other leading companies.

The exhibition **STANKOSTROENIE -2014** will definitely assist the foreign companies to **strengthen their positions** in the Russian market **and increase their sales** in this region. It will provide a full range of product promotion possibilities!

Participation in **STANKOSTROENIE-2014** exhibition is a unique chance to present your company in Russia, directly meet a great number of specialists and establish long-time business relations.

The event offers a wide range of advertising possibilities both for the exhibitors and visitors. Special marketing programs, individual approach and advertising campaign will make your participation effective and profitable.

Discover the Russian market, use new opportunities and meet your buyers. Participate in modernization process.

We will be happy to see your company at the **STANKOSTROENIE-2014** event!

Sincerely Yours,
Marina Rogachova
Exhibition Director
Mob.+7(495)767 3597

IMTES/ STANKOSTROENIE- 2014 **October 14-17, Crocus Expo**

Metalworking machine: drilling machines, grinding machines, gear machines, milling machines, eletromechanic and electro physical metal processing machines, band-sawing machines (band saws).

Forge-and-press machinery: mechanical and hydraulic presses, forge-and-press automation, incl. CNC, horizontal forging machines, bending and straightening machines, metal shears, cold knurling and mandrel machines.

Bearings. All kinds of bearings: sliding bearings, hub bearings, etc. equipment for bearings production.

Hydraulic and pneumatic tools, pneumatic instrument, lubricating equipment, filters, electric engines (asynchronous and double-current motor drives, etc.)

Instrument: metal-cutting instrument, cutting edge tools, abrasive tools, professional diamond tools; superhard material instrument. Electric instrument, plasma cutting tools, professional pneumatic instrument, fitting-and-assembling toosl, engine repair tools and some other instrument. System of instrumentation, coding and inventory of plasma cutting and other types of instrument. Complex supply of machine systems with toolkits.

Woodworking

Foundry. technologies and equipment for foundry industry. Foundry equipment and molding material, foundry technologies (foundry and all technological processes related to foundry and foundry equipment), foundry shop, welding equipment.

Welding technologies and equipment. Technologies for electric welding of metals, for plasma, laser and gas-flame welding, cutting, hard-surfacing, for thermal-processing, resistant welding, for soldering, welding equipment renovation

Sheet metal working technologies. Sheet metal, tube, sections (ferrous and non-ferrous) separation, cutting, handling, forming, flexible sheet metal working, machine elements, joining welding, fastening, tube / section processing, surface treatment of sheet metal, automation and robotics

Controlling, regulating, measuring, testing machines, tools and instruments: automated measuring system. Measuring equipment for automated complexes. In-process gage for surface quality and form accuracy. Systems and tools for control and diagnostics of metal-working machinery, equipment and metal-processing tools. Measuring tools and devices, quality assurance, data processing

Automation and robotics, industrial information technologies. Software, production automation, associate items and component parts, machine-tool attachment, operational goods. Controlling system preparation units, CAD programs, automated control systems and process design. Devices and elements for metal-working equipment automation (metal-working machines). Electrical equipment set and actuators. Geared systems and gear motors. Unified assembly, sockets, general mechanical rubber goods, operational goods, etc.

Handling and Warehousing Equipment, handling and lifting appliances. Logistics.

Repairing and reconstruction and update of machines and equipment. Repair and update of technological equipment, reconstruction of machines and equipment, service maintenance, including metallurgical industry, at various plants. Machines for engines repair.

Terms for participation:

	Price in Euro	Price for Japanese companies (20% discount)
Registration Fee/ information in the catalogue, logo in the catalogue	380	304
1 sq.m unequipped space	250	200
1 sq.m standard equipped space 9 m ~ 100 m	300	240

Supporting The Ministry of Industry and Trade of the Russian Federation

In 2013 the **exhibition «IMTES/Stankostroenie»** was held with the support of the Ministry of Industry and Trade of the Russian Federation. At the opening Ceremony with welcome word from the Minister of the Ministry of Industry and Commerce of Russia D.V. Manturov, the Director of the Department of metallurgy and heavy engineering of the Ministry of Industry and Trade of the Russian Federation V.V. Semenov.

Уважаемые участники, организаторы и гости выставки!

От имени Министерства промышленности и торговли Российской Федерации поздравляю Вас с открытием Международной специализированной выставки «Станкостроение-2013».

Станкостроительная отрасль формирует базу для модернизации основных фондов практически во всех секторах промышленности. И гражданских, и ОПК. Фактически, от нее зависит степень индустриального развития страны.

На государственном уровне реализуется комплекс мероприятий, направленных на развитие станкоинструментальной промышленности. Одной из важнейших мер является подпрограмма «Развитие отечественного станкостроения и инструментальной промышленности» на 2011-2016 годы, реализация которой способствует модернизации отрасли, повышению ее инновационной составляющей, наращиванию выпуска конкурентоспособной отечественной продукции.

Проведение сегодняшней выставки позволит широкому кругу специалистов ознакомиться с образцами оборудования, в том числе разработанными в рамках реализации данной подпрограммы и по достоинству их оценить.

Уверен, что «Станкостроение-2013» будет способствовать решению задач обновления производственной базы предприятий, привлечению инвестиций, установлению взаимовыгодных связей между российскими и зарубежными производителями оборудования.

Желаю всем участникам выставки успешной работы!

Министр
промышленности и торговли
Российской Федерации

Д.В. Мантуров
