Prospects for cooperation

Localization of production is an effective tool for entering the Russian market

Our capabilities

Cooperation with leading enterprises

Stavropol region

High tech

- The global leader in the manufacture of sapphire for the optoelectronics industry, as well as aluminum and silver pastes for solar energy
- The only company that supplies sapphire worldwide
- 98% of production - export
- Prospects: development of relations in the field of optical elements, IT-technologies and communication facilities

Agroindustrial complex

- One of the fastest growing large producers of mineral fertilizers
- The production geography expands and covers Russia, Lithuania, Kazakhstan and Belgium, as well as China, where the joint venture is launched
- Activities in more than 25 countries - direct access to the main markets through a logistics and distribution network
- Prospects: agrochemical cooperation

Automobile industry

Stavropol-Auto

- Joint Russian-Chinese project
- Assembly of cars of the Great Wall brand and the Italian IVECO trucks
- The production capacity of the enterprise - 100 000 cars a year
- Active market capture and off-road vehicles Great Wall Hover H3 production
- Working with a dealer network all over the country
- Prospects: the possibility of supplying components and the creation of related industries

Products for daily use

- Aerosol cluster in the field of high technologies
- The national leader in the volume of production and sale of perfumery and cosmetic products and household chemical goods
- Prospects: participation in the National Aerosol Cluster project by introducing new technologies
