JEWELRY & SOUVENIRS

SINCE 2016

“Yakutian bone carving factory” Tusku LLC

Exclusive handcrafted souvenirs, jewelry, interior items, details and semi-finished products

A close-up photograph of a mammoth skull and tusks. The skull is dark brown and textured, with two large, curved tusks extending from it. The tusks are a lighter, yellowish-brown color and have a smooth, polished appearance. The background is dark and out of focus.

History

Mammoths. Yakutia (Siberia). Mammoth Tusks.

For thousands and millions of years we have been separated from one of the most magnificent inhabitants of our planet. The Arctic zone of Siberia is a real treasure trove. According to some data, in Yakutia there are about 80% of all fossil reserves of mammoth and mammoth tusks. Mammoth tusk is a non-renewable resource, precious material for bone carving art and traditional crafts.

We make an invaluable gift for all the people of our planet. We invite everyone to touch history from the depths of permafrost, from the very heart of the ice age. Products from a unique material - mammoth tusk, for every taste. Here and now, in our time. Take and save your legend.

About us

Our company was established in 2016. We have a full production cycle, from the extraction of raw materials to the production of finished products. Masterpieces of bone carving art, exclusive souvenirs and interior items, jewelry and blanks for jewelry, accessories and details for design decisions, corporate gifts and semi-finished products of various sizes and geometric shapes for future products are created daily in our factory.

Over the entire period of work, our company has established itself as a reliable and responsible business partner. Individual approach to customers. We fulfill orders on time. Delivery of products to anywhere in the world is possible.

Partners trust

Each type of product is issued a certificate that certifies that the product you purchased is made from a mammoth tusk, mined in the Republic of Sakha (Yakutia) in the Russian Federation.

Our company guarantees the authenticity of unique material, high quality products and the best prices from the manufacturer. We are members of the Chamber of Commerce and Industry of the Republic of Sakha (Yakutia) and the “Made in Yakutia” Manufacturers Association. We are working on mammoth fauna with the Academy of Sciences of the Republic of Sakha (Yakutia). We take part in internationally recognized major international exhibitions with the participation of REC and promote our brand. We support and develop bone carving art, science, sports and folk art crafts in the Far North.

Evaluation of our activities

For participation and support at various cultural, sports and scientific-educational projects and events, our company has received recognition from republican departments and institutions. Confirmation of this are diplomas, letters of appreciation and thanks.

We reciprocate this and provide sponsorship, help young bone carvers, instill in the younger generation an interest in bone carving art and paleontology in general. Pupils write different scientific papers on this topic.

Our task is to revive and preserve the industry, so that the traditional crafts of indigenous peoples and bone carving art develop further.

Wildlife conservation and relation to the environment

Our activity is not only related to production, but also has great benefits for the animal world. The mammoth tusk is the only substitute for a valuable elephant tusk today. Thus, we offer an alternative, thereby saving lives and preserving the number of elephants now living, which poachers hunt for selling their tusks on the black market, exterminating animals.

Mammoth tusks are mined by collecting them manually at the places of natural collapse of the coastline, river floodplains, and in areas where landslides form during thawing of the earth's surface. Therefore, damage to nature by heavy equipment and a mechanized method is not done.

Project “The World Mammoth Center”

In 2019, we began preparatory work on the unique project “The World Mammoth Center” in Yakutsk, the capital of the Republic of Sakha (Yakutia), the largest region of Russia. This is the largest administrative and territorial unit in the world with an area of more than 3 million square kilometers. According to some data, about 80% of all reserves of mammoth tusks and the remains of mammoth fauna are located in Yakutia (Siberia). That is why the city of Yakutsk will become the center of the Mammoth of Russia and the world, which will entail the development of tourism and related infrastructure. Our project will include a theme park with sculptures of animals of that period, the main building with unique architecture, which will house the Tusku bone-carving factory, a training center for bone carving and master classes, a mammoth fauna museum, a scientific laboratory, a storage mammoth tusks and other valuable scientific materials requiring special storage conditions, auction house for the sale of tusks and other paleontological materials, an exhibition of products and a gift shop, hotel and restaurant.

Most of the territory of Yakutia is located in “permafrost” and is the coldest place on earth where people constantly live. The annual temperature amplitude is about 100 °C, in winter the cold is up to -60 °C, and in summer the heat is up to + 40 °C. In Yakutsk, there is an international airport that accepts almost all types of air transport, the design and construction of a bridge across the Great Lena River begins, which will provide year-round access for lovers of car travel and in summer for motorcyclists. This project will become one of the most recognizable places in the world and a visiting card of our republic and Russia.

We invite you to participate in the implementation of a large-scale project of world significance.
